Displaying a Class List in Blackboard

Earlier versions of Blackboard provided a simple roster function. The most recent release did away with that function and uses the search function to generate a list of enrolled users.

To display a list of users in the course, go to the Course menu and Tools link.

Click on the Roster Link:

On the Roster page, change the second field from "Contains" to "Not Blank" using the dropdown menu:

A page showing all the users enrolled in the course will display.

Alternatively, you can check the Grade Center (in the Evaluation section of the Control Panel) for a list of student users.
