Viewing your Grades in Blackboard

Overview
Blackboard has a grade book feature that allows you to see your own grades. Access to grades might be important if you lose a graded assignment and want to know how you are doing in a course. If your instructor uses the grade book and gives you access to your grades, viewing your grades is a mouse click away.

Viewing Grades
There are two ways to view grades, from the “My Assumption” page or from within a course. From My Blackboard in the Global Navigation Panel, click on the My Grades icon:

You can view grades by date or by course. When viewed by date, the grades for the most recent work will be displayed. When displayed by course, your current grades in the courses you are enrolled in are displayed. Clicking on one of the grades will display the assignments in that course for which you have grades.
From within a course, click on the Tools menu item, and then select the "My Grades" link on the tools page. The grades for the course you are in will be displayed.

On the My Grades page you will see a list of the items you have completed that have grades and your current course grade (generally a running grade). Clicking on the Description or Grading Criteria links provides more details about the grade and how it was calculated. Clicking a Comments link will display the instructor's comments to you for that assignment.
